Business use cases

Reliable use and sourcing of digital data support the general safety of communities and provide healthcare services via new, remote and contactless channels.

The Onboarding condition:

- Checking customer's ID card no. from Client's database

As claim condition:

- ID card copy or take selfie with ID card

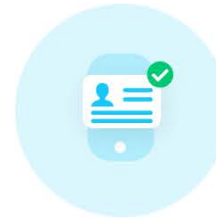

Our solutions proposed

Preventing fraud and increase security by **Liveness+OCR**

Proof scammers use fake documents to collect hefty reimbursement and support automated data entry.

Combating fraud by **Checking online DOPA**

Document authentication and validity check.

Increasing security and detect fraud by **Liveness+Facial recognition**

Users simply take a photo with a smartphone and the SCB TechX solution verifies the identity.

Improving treatment with customized KYC by **NDID verification**

To provide Identity and verification service real time through online channel and link customer's info from AS.
